

# Rodopi DNA

Domain Name Automation and Registration

## The Automated Domain Name Registration and Management Solution

**R**odopi OSS software now features the DNA module which automates the processes of registering and maintaining new and existing domain names. This fully web-enabled application provides remarkable domain name manageability for Internet service providers (ISPs), application service providers (ASPs), hosting service providers (HSPs) and Internet telephony (VoIP) providers by offering:

▶ **Automated Processes**

Eliminate time spent manually registering and maintaining customer domain names. Rodopi DNA automatically manages all aspects of a domain business including:

- ▶ Registration of new names
- ▶ Transfer of existing registrations
- ▶ Renewals (automatic and manual)
- ▶ Extensions
- ▶ Modification of names servers and passwords
- ▶ Expirations
- ▶ Name deletions

▶ **Pre-Integrated Registrars**

Rodopi DNA is pre-integrated with Register.com, Tucows and Names4Ever registrar services and is the perfect domain name management add-on for existing Rodopi OSS or EasyOSS™ (hosted) customers.

▶ **Reduced Costs, Increased Revenues**

Rodopi DNA enables an incremental revenue stream, while minimizing time and labor costs associated with manually managing a portfolio of customer domain names.

▶ **Complete Business Automation**

Combined with Rodopi's back office automation applications, Rodopi DNA provides a complete OSS solution designed to streamline operations and deliver a powerful business model that seamlessly expands as your business grows.

Rodopi DNA offers service providers the key to successful and profitable domain name management with benefits like:

- ▶ 24/7 domain name online activation and maintenance
- ▶ Automated deletion of unused names
- ▶ Seamless integration with registrars
- ▶ Easy-to-use service templates enable quick implementation

## Technical Specifications

- ▶ 100% Web Enabled Architecture
- ▶ Microsoft® Windows® 2000, 2003
- ▶ MS SQL Server 2000
- ▶ XML-Based API
- ▶ Powerful Event Driven Integration
